*Did you know...*

# HAVING A PLAN CAN CUT YOUR PAVEMENT COSTS IN HALF !

**Stop spending money on your parking lots  
and starting investing in them instead!**

Use our pavement maintenance cost calculator below to see how much it could cost\* you to repair a badly damaged asphalt parking lot and find out how to reduce your costs over time by investing in an annual maintenance plan.

**STEP 1** Type in the number of parking spaces in your lot(s).

My parking lot has \_\_\_\_\_ spaces.

A typical parking lot with this many spaces  
has roughly this much pavement area:

\_\_\_\_\_ square yards

Calculations are based on this surface area.

**STEP 2** Select the image that best represents the overall condition of your parking lot(s).

## Maintenance To Do List

Parking lot in:

Minor  $\longrightarrow$  Major

Crack Seal	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Seal Coat	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Pavement Patching	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Mill & Overlay	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

\*The calculator provides ballpark costs based on average conditions for illustration purposes only. Actual costs could vary significantly depending on several factors including - but not limited to - traffic, drainage, quality of the initial construction, soil quality, weather, and construction settlement. Pavement may deteriorate at a faster or slower rate. A qualified engineer can identify not only the current quality of your pavement, but how to fix underlying issues that may contribute to additional long-term expenses.

**STEP 3** Call or email us for a **FREE** consultation about your facilities. We can help create a plan just for you!

We also offer **FREE** pavement maintenance education sessions and other information for school board of directors to help in understanding how the right plan can reduce long-term costs.
